3. Crast. Animarum. } 6. Quind. Martini.

Note also, that the *Exchequer* openeth eight dayes before any Terme begins, (except *Trinity* Terme (in which it openeth but foure dayes before.

BIBLIOTHECA BODLEIANA

A description of the foure quarters of the Yeare.

And first of Winter.

☉. in ♑. ♒. ♓.

WInter Quarter (after the Astronomers accompt) began the 11. day of *December*, 1648. and continueth untill the 10. day of *March* this yeare, 1649. So that alwaies the first part of the Astronomicall Winter is in one politique yeare, and the latter end thereof is in the other; at which time was the shortest day of the year, by reason of the Suns greatest declination from the Equinoctiall Line.

This Season, of its own naturall disposition, is known to be cold and moist, contrary to the quality of Summer; and in this Quarter the inward parts of man are very hot, and being healthfull may receive plenty of Food, because naturall heat is now comforted, and is gone inward, and there increased, and maketh digestion the better.

How the Weather will be therein disposed; is noted for each day throughout the Quarter.

The Sicknesses that accompany this Quarter, wherewith many will be grieved, are these and such like, namely, paine in the Stomack;

Laskes of sundry sorts, the Chollick and Illiack passion, Falling-sickenesse, and swoundings, diseases proceeding of rottennesse and corrupt humors, Coughes, thin Rhewmes, head-ach, with other Infirmities.

Of the second part of the yeare, called the Spring.

☉ in ♈. ♉. ♊.

THe Sun having fully finished the Winter Quarter with the last part of *Pisces*, beginneth the Spring the 10. day of *March*, then entering into the first minuite of *Aries*, the Equinoctiall Signe, and maketh the day and night of equall length, and continueth untill the 11. day of *June*.

This Season of his naturall quality, is hot and moist temperately, and likewise very healthfull, and is therefore accounted the fittest time in the yeare to ease diseased Bodies in, and to restore health againe to those in whom formerly it hath been decayed by any kind of evacuation.

The particular condition thereof may bee seen in the daily disposition of the Season.

The Sicknesses of this Quarter, are Melancholy

choly, Madneſſe, the Falling-ſickneſſe, Bleeding at the Noſe, Horſeneſſe, Coughs, Itch, Scales, many Ulcers and ſmall Apoſtumes, the Gout, and paine in the Joynts, Pluriſies, Dropſies, peſtilent Agues, ſhortneſſe of breath, Faintings, paine in the Head, Eyes and Stomack, rotten Fevers, new Agues, and other ſtrange diſeaſes.

Of the third part of the yeare called Summer.

☌ in ♋.

THe third part of the yeare Aſtronomicall, called the Summer Quarter, taketh alwaies its beginning at the Suns entrance into the firſt degree of Cancer, which is the 11. of *June*, at which time he maketh his greateſt declination toward the North from the Equinoctiall, and cauſeth the longeſt day and ſhorteſt night in the yeere; and ſo Summer holdeth on till the 12. of *September* following.

The predominate qualities of this Seaſon (according to his proper nature) are heat and dryneſſe, ſpreading them abroad in each part of the body.

As for the diſpoſition of the Weather,

you may see in the daily Inclination.

The Sicknesses at this time are divers, as burning Agues, Plurisies, Frensies, hot Apostumes, divers paines in the Head, sundry Inflamations and new Infirmities proceeding especially of hot Chollerick Humors, wherewith many will be sore vexed.

Of the fourth part of the year, called Autumne, or fall of the Leafe.

☉ in ♎. ♏. ♐.

THe Harvest Quarter (or fall of the Leafe) beginneth at the time of the Suns departure from the last (tuple of the 30. degrees of *Virgo*, into the first minute of the second Equinoctial Sign Libra, being the 12. day of *Septem.* and doth last untill the 11. of *December*, when the Sun shall enter into Capricorne.

This Season is naturally inclined to be cold and dry, yet it is evermore disposed to be unconstant and variable, by meanes whereof it is the nurse of most Sicknesses hapning in the Spring.

And how the Ayre is like to be inclined throughout all Harvest, may be seen in the daily disposition of the Season.

The

The Diseases and Sicknesses most like to molest people this Quarter, are these, and the like, as namely Opelations in the Spleen, Costivenesse, shortnesse of breath, fretting in the Bowells, Falling-sickneſſe, and many other Melancholie effects, paine in the sides, as Stitches and Cramps, Convulcions, Dropsies, Sciaticaes, the Stranguary, Chollick, and many more.

Of three Eclipses this yeare, 1649. one of the Sun, and two of the Moon.

THe first Eclipse of the Moon, is upon the 16. day of *May*, about three quarters of an houre past two of the clock in the morning.

The second Eclipse is of the Sun, upon the 25. day of *October*, three quarters of an houre past one of the clock in the afternoon.

The last is of the Moone, upon the 9. day of *November*, three quarters of an houre past 6. of the clock in the morning.

Here followeth certain Phyſicall Verſes, with the daily Inclination and diſpoſition of the weather, the New, Full, and Quarters of the Moon.

Alſo ſhort Rules for Husbandry, for every Month throughout the year.

Of January.

If thou be ſick, and helpe wouldſt have,
